

General Disclaimers

This website does not constitute an offer of services or securities by 21Shares AG, Amun Crypto Basket Index, or its affiliates (collectively “21Shares”). All information provided by 21Shares is impersonal and not tailored to the needs of any person, entity or group of persons.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. 21Shares makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. 21Shares is not an investment advisor and makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth on this website. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. 21Shares is not a tax advisor. A tax advisor should be consulted to evaluate the impact and consequences of making any particular investment decision. Inclusion of any assets within an index is not a recommendation by 21Shares to buy, sell, or hold such security, nor is it considered to be investment advice. Closing prices for 21Shares Crypto Basket Index is calculated by MV Index Solutions GmbH according to the prices of the individual constituents of the index as set on CryptoCompare.com with a certain time stamp defined by MV Index Solutions GmbH.

Investments into crypto currencies and/or digital assets are subject to material and high risk including the risk of total loss. The calculated prices may not be achieved by investors as the calculated price is based on prices from different trading platforms. Furthermore, an investment into crypto currencies and/or digital assets may become illiquid depending on the trading platform or investment product used for the specific investment. Investors should carefully review all risk factors disclosed by the relevant trading platform or in the product documents of relevant investment products.

Performance Disclaimers

Charts and graphs are provided for illustrative purposes. Past performance is not an indication or guarantee of future results. The charts and graphs may reflect hypothetical historical performance. All information presented prior to the launch date is back-tested. Back-tested performance is not actual performance but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index(es) was officially launched. It is not possible to invest directly in any index.

Prospective application of the methodology used to construct the index(es) as well as revisions to economic data may not result in performance commensurate with the back-test returns shown. The back-test period does not necessarily correspond to the entire available history of the index(es).

Another limitation of using back-tested information is that the back-tested calculation is generally prepared with the benefit of hindsight. Back-tested data and/or information reflects the application of the index methodology and selection of index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities, fixed income, or commodities markets in general which cannot be, and have not been accounted for in the preparation of the index information set forth, all of which can affect actual performance.

The index returns shown do not represent the results of actual trading of investable assets. MV Index Solutions GmbH maintains the index(es) and calculates the index levels and performance shown or discussed but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the assets underlying the index(es) or investment funds that are intended to track the performance of the index(es). The imposition of these fees and charges would cause actual and back-tested performance to be lower than the index performance shown.
